

CAS 137525-51-0 Peptide Vials 2mg Pentadecapeptide BPC 157 For Bodybuilding

Our Product Introduction

for more products please visit us on bodybuild-supplement.com

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10vials
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: BPC 157
- Appearance: Lyophilized Powder
- Cas: 137525-51-0
- Purity: 99%
- Usage: Supplement For Bodybuilding
- Highlight: **CAS 137525-51-0 Peptide Vials, Bodybuilding Peptide Vials, Pentadecapeptide BPC 157**

Product Description

CAS 137525-51-0 Peptide Vials Supplement For Bodybuilding 2mg Pentadecapeptide BPC 157

Basic Information Form Of BPC157

Product Name	BPC157
Molecular Formula	C62H98N16N22
Cas No.	137525-51-0
Molecular Weight	1419.556
Shape	White powder
Purity	>99%
Shelf Life	2 years

What is BPC157

BPC-157, or pentadecapeptide, is categorized as a body protection compound. It is composed of 15 amino acids in a very particular sequence that doesn't exist naturally.

It is artificially synthesized in laboratories using the partial sequence of the body protecting compounds isolated from gastric juices. Hence, it is one of the derivatives of the peptide found in human gastric juices.

Application Of BPC157

BPC 157 has a strong anti-inflammatory activity in both acute and chronic inflammation models, it may become an important therapeutic tool for the treatment of inflammatory bowel disease. BPC 157 was shown to accelerate wound healing and to have a marked angiogenic effect. And it significantly facilitates the healing of bone fracture in rats, exhibits an osteogenic effect significantly improving the healing of segmental bone defect. BPC 157 accelerates the healing of transected rat Achilles tendon and transected rat quadriceps muscle, significantly accelerated the outgrowth of tendon explants. Cell proliferation of cultured tendon fibroblasts derived Achilles tendon was not directly affected by BPC 157 as evaluated by MTT assay.

Because BPC 157 has proven to be isolated from gastric juices, it should not be a surprise to find that various scientific studies that have been conducted on animal test subjects have been able to pinpoint several links between the peptide's presence and digestive tract functionality. Specifically, it has been determined that BPC 157 exhibits the capacity to regulate and control the manner in which the digestive tract can operate.

One of the ways that BPC 157 accomplishes this is through safeguarding the endothelium, which is the thin layer of cells that line the blood vessels' interior surface. Another way the peptide carries out regulatory function is by being a key factor in the process of angiogenesis; that is, the process in which new blood vessels are formed from pre-existing blood vessels.

Usage Of BPC157

BPC 157 has a strong anti-inflammatory activity in both acute and chronic inflammation models. In fact, preliminary results in clinical trials suggest that BPC 157 may become an important therapeutic tool for the treatment of inflammatory bowel disease. BPC 157 was shown to accelerate wound healing and to have a marked angiogenic effect. In addition, it significantly facilitates the healing of bone fracture in rats. This peptide also exhibits an osteogenic effect significantly improving the healing of segmental bone defect. BPC 157 accelerates the healing of transected rat Achilles tendon and transected rat quadriceps muscle.

Package: 5mg/vial, 10vials/box

Shipping: With 3-5days after your payment

Benefits:

There have been many positive effects noted by those who have experimented with the use of BPC-157 for issues including bone healing, ligament healing, general regenerative properties and more. We will list just a small few of the key health

benefits here.

1. Potent anti-inflammatory
2. Possesses neuro-protective properties—specifically modulating the serotonergic and dopaminergic systems
3. Promotes angiogenesis and vasculogenesis
4. Accelerates wound healing (e.g. muscle, ligament, tendon, nerve)
5. Promotes cell survival under stress
6. Maintains GI mucosal integrity
7. Protects and prevents gastric ulcers
8. Improves digestive function (IBS)
9. Used in Inflammatory bowel disease (IBD) exacerbations/flare
10. Protects liver from toxic insults (alcohol, antibiotics, etc) and promotes healing
11. Repairs tissue; such as GIT, tendons, ligaments, brain, bone, etc
12. Effective treatment for Traumatic brain injury (TBI)
13. Protects and heals inflamed intestinal epithelium (Leaky Gut Syndrome)

FAQ Of Enhanced Athlete BPC157

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
